CSE 310 - PROGRAMMING ASSIGNMENT 2

Python file: **analysis_pcap_tcp.py**

- This file has the code for my analyser for both PartA and PartB
- When executed, it provides outputs of both parts.
- Output is obtained by simply running the program.
- I have hardcoded the IP addresses of the source and destination in the code itself.

Libraries used/imported in python:

- dpkt
- struct

Other files in the root folder:

- **README HW2.pdf** - This contains instructions on how to run the code
- **assignment2.pcap.**
- **SUMMARY HW2.pdf**
- **output.pdf** - contains the output of the instance explained in the summary pdf.
